

Don't Let an Enlarged Prostate Control Your Life.

Now Offering a Fast and Effective Treatment for BPH

Benign Prostatic Hyperplasia, or BPH, is a common condition in which the prostate enlarges as men get older. Over 40% of men in their 50s and over 70% of men in their 60s have BPH. While BPH is a benign condition unrelated to prostate cancer, it can greatly affect a man's quality of life.

Symptoms include:

- Frequent need to urinate, both day and night
- Weak or slow urinary stream
- A sense that you cannot completely empty your bladder
- Difficulty or delay in starting urination
- Urgent feeling of needing to urinate
- A urinary stream that stops and starts

BPH Relief Without Ongoing Medication or Surgery

The FDA-approved UroLift® System is a one-time, in-office solution offered at Mon Health Medical Center that provides relief from BPH without ongoing medication, surgery or sexual dysfunction.
