

# Mon Health COVID-19

## Mon Health System General Visitation Guidelines

- All visitors should arrive wearing a mask and continue to wear during their entire stay.
- Visitors will be screened at the entrance using CDC recommended questions.
- All visitors should apply hand sanitizer upon entry and departure from patient rooms and the facility.
- Visitors must be age 18 or older.
- Compassionate care considerations and exceptions may be made on a case-by-case basis.

## Adult Inpatient and Surgery/Procedural Visitation

- Adult inpatients who are admitted to a Mon Health facility may designate one consistent visitor throughout their stay during visiting hours.
- No visitors permitted for anyone in isolation for suspected or confirmed COVID-19.
- Individuals accompanying surgery patients will be directed by surgical/procedural staff regarding where to wait for updates after the procedure.

***\*\*Exceptions to visitation may be made based on patient condition and will be evaluated by the department leader and/or nursing supervisor.***

### Labor & Delivery and Mother Baby Unit Visitation:

- Labor & Delivery and postpartum patients who are admitted to a Mon Health facility may have one designated support person in labor, delivery, and for the duration of the mother's hospital stay.

### Emergency Department Visitation:

- Emergency Department patients at a Mon Health facility may have one person accompany them into the facility/room if needed to facilitate the visit.
- All other visitors must remain in vehicles.

### Outpatient Testing Physician Offices and Clinics Visitation:

- Due to limited space in waiting rooms, visitors will not be allowed to wait in the waiting areas.
- If an essential caregiver is needed for assistance, only one person may accompany the patient.
